ARMAN SHAIKH

Ahmednagar, Maharashtra | +91 9561943782 | armanshaikh0710@gmail.com

PROFESSIONAL SUMMARY

Computer Science undergraduate and Software Engineering Intern with hands-on experience in Java, object-oriented programming, Angular, TypeScript, JavaScript, REST APIs, backend services, SQL, PostgreSQL, Git, testing, debugging, and full-stack web development. Experienced in building and integrating frontend components, REST APIs, database-backed applications, authentication, and production-oriented workflows. Strong foundation in Java/Spring Boot concepts, clean coding practices, API development, software testing, and AI-assisted development. Eager to contribute to Java 17+, Spring Boot 3.x, Spring Framework, JPA, and Angular-based enterprise applications.

TECHNICAL SKILLS

Programming Languages: Java 17 fundamentals, JavaScript, TypeScript, Python, C, SQL
Java / Backend: Core Java, OOP, Spring Framework fundamentals, Spring Boot fundamentals, REST APIs, API integration, Node.js, Express.js, Python/FastAPI
Frontend: Angular, Angular Components, Services, Routing, TypeScript, RxJS basics, JavaScript, HTML5, CSS3, Responsive UI
Database: SQL, PostgreSQL, MongoDB, Database Design, CRUD Operations
Testing & Quality: Unit Testing fundamentals, API Testing, Postman, Debugging, Error Handling, Code Validation
Development Practices: Git, GitHub, MVC, Layered Architecture, RESTful Design, OOP, Clean Code, Design Patterns fundamentals
AI-Assisted Development: LLM APIs, AI Application Development, Prompt Engineering, MCP, AI Workflows, Tool Orchestration, AI-assisted coding and code validation
Tools / DevOps: Git, GitHub, Postman, npm, Vite, Docker, AWS fundamentals, deployment concepts

WORK EXPERIENCE

SharpFlux Technologies — Software Engineering / Full Stack Intern | Current

- Contributing to Playground and Sugam AI OS, an AI intelligence layer connecting existing applications with conversational AI capabilities.
- Developing and debugging backend services, REST APIs, integrations, and full-stack workflows using Python/FastAPI, Node.js, React.js, PostgreSQL, MongoDB, and related engineering tools.
- Working with API design, request/response handling, validation, error handling, database operations, Git workflows, testing, and debugging.
- Working on LLM-powered workflows including model integration, prompt design, tool calling, structured AI responses, and API integrations.
- Implementing MCP-based tool integration so AI agents can discover and execute application capabilities through standardized tool interfaces.
- Building multi-turn WhatsApp AI workflows with message processing, media handling, deduplication, conversation state, and action execution.
- Working on authorization, state management, testing, and reliable execution across applications and workflows.

ProAzure Software Solutions — Full Stack Web Developer Intern | 09/2025 – Earlier Internship

- Developed full-stack web applications using Angular, TypeScript, JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, REST APIs, and Git-based development workflows.
- Developed reusable Angular components and frontend functionality using TypeScript, services, routing, forms, and API integration.
- Built and integrated REST APIs and participated in debugging, application development, database operations, and Git workflows.
- Implemented RPA automation for repetitive business processes and document workflows involving Word, Excel, and email.

SELECTED PROJECTS

Builder Property Management Platform — Angular Full Stack

- Built a full-stack property listing and management platform using Angular, TypeScript, HTML, CSS, Node.js, Express.js, MongoDB, and REST APIs.
- Developed reusable Angular components, services, routing, forms, property listing screens, search/filter functionality, and API-driven UI workflows.
- Implemented backend REST APIs, authentication, MVC architecture, CRUD operations, and database integration.
- Integrated Cloudinary for property image upload and storage and used Git for source-code management.

Sugam AI OS / Playground AI Integration — AI-powered platform integrating conversational intelligence with existing applications.

- Worked on LLM execution, MCP tools, WhatsApp workflows, authorization, conversation state, orchestration, API integrations, testing, and backend architecture.
- Worked with structured AI responses, tool calling, error handling, state management, and production-oriented application workflows.

E-Commerce Website for Farmers — Built an accessible web platform enabling farmers to purchase fertilizers through a simple online interface.

Better Meals Platform — Developed a web platform helping users discover suitable meals based on dietary preferences and providing feedback functionality.

EDUCATION

B.Tech in Computer Science and Engineering — Sanjivani University, Kopargaon | Expected 01/2027

Diploma in Computer Technology — P. Dr. V. V. P. Institute of Technology and Engineering, Loni | Completed 01/2024

CERTIFICATIONS & TRAINING

- Artificial Intelligence with Machine Learning
- MongoDB Developer Certification
- Java Fundamentals
- Introduction to Python
- C Language Programming
- SpectraVision Workshop — National Chung Cheng University, Taiwan

ADDITIONAL STRENGTHS

Full-stack development • Java & OOP fundamentals • Angular & TypeScript • REST API development • SQL/database fundamentals • Testing & debugging • Git/GitHub • API integration • Problem solving • Rapid learning • AI-assisted development
